CLASS 16: Hanging wall displays made primarily of ceramic or concrete with metal support stands therefor, sold as a unit in the nature of holders for pencils, pens, and printed notepad holders

FIRST USE 1-1-2015; IN COMMERCE 1-1-2015

CLASS 21: Hanging wall displays made primarily of ceramic or concrete with metal support stands therefor, sold as a unit in the nature of holders for flowers and plants

FIRST USE 1-1-2015; IN COMMERCE 1-1-2015

The mark consists of a three-dimensional configuration of a holder comprised of solid lines showing a wire frame in the shape of a two-dimensional parallelogram, the parallelogram having two opposite longitudinally arranged vertices and two opposite laterally arranged vertices, the frame further comprising an angled wire extending from the lower most longitudinally arranged vertex having a lower junction point and an upper junction point. Solid lines depict the frame further comprising an angled wire bracket member fixedly secured to the frame below and proximate to one of the two laterally arranged vertices at one end and secured to the frame below and proximate to the other laterally arranged vertex at its other end, with an inverted pyramidal-shaped container, having an open top base and a closed bottom, arranged to be held within a bracket formed by the angled wires. Dotted lines indicate the upper junction point of the angled wire extending from the lower most longitudinally arranged vertex is joined to the angled wire bracket member at a midpoint thereof.
